HEATING COOKER

(57) Abstract:

PURPOSE: To enable heating cooking which is free from unevenness of heating by effectively and smoothly supplying air into a heating cooking chamber by a fan.

CONSTITUTION: A back plate 16 is provided with a depression 22 and a front plate 23 is disposed in an opposing relationship with the back plate 16. A fan chamber 24 is formed by a space defined between a plate face of the front plate 23 and a bottom face 22a of the depression 22, and an exhausting port 25 is formed by a space defined between a fringe portion 23c and an opening fringe portion 22b of the depression 22. The front plate 23 is provided with an inlet port 26 at a central portion. A fan 27 and a heater 28 are installed in the fan chamber 24.
